

ITEM: 23

SUBJECT: Rescinding Various Waste Discharge Requirements

REPORT: Following is a proposed order rescinding 2 sets of waste discharge requirements that are no longer needed.

RECOMMENDATION: Adopt the proposed Order.

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL VALLEY REGION

ORDER NO.

RESCINDING VARIOUS WASTE DISCHARGE REQUIREMENTS

The California Regional Water Quality Control Board, Central Valley Region, finds that the Board adopted the following Orders, which are no longer applicable for the reasons shown:

Order No. 89-053, adopted 31 March 1989, prescribes WDRs for the Simoes Dairy at 6286 W. Woodbridge Road, Lodi, San Joaquin County. Regional Board staff inspected the site on 15 August 2005 and found the facility is being dismantled. There was no evidence of manure solids at the site. The site is being prepared for housing. The site will never be operated in the future as a confined animal facility. The WDRs for this site should be rescinded, as the facility no longer poses a threat to water quality.

Order No. R5-2004-0017 adopted on 30 January 2004, prescribes WDRs for Miller Springs Remediation Management, Inc., Former Winton Facility, Enhanced Bioremediation Project, Merced County. The WDR prescribes discharge specifications to study the effect on groundwater of injecting sugar into remediation wells. The WDR also prescribed groundwater monitoring of the in-situ bioremediation on nitrate concentrations in groundwater. The project has been completed, groundwater conditions have stabilized, and the permit should be rescinded.

IT IS HEREBY ORDERED that the above waste discharge requirements Orders and Resolutions are rescinded.

I, THOMAS R. PINKOS, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Central Valley Region, on 16 September 2005.

THOMAS R. PINKOS, Executive Officer
